### Gordon Levine

**Lead Homeless Services Specialist - ICF**

Gordon Levine (he/him) is a community development expert with more than ten years' experience building high performing, resilient systems to prevent and end homelessness. He is a lead Homeless Services Specialist with ICF, a nationally recognized technical assistance provider, where he specializes in Continuum of Care (CoC) systems development (including coordinated entry and housing problem-solving), statewide homelessness response, and the intersection of homelessness and domestic violence response.

### Webinar Description

Using the lens of the Violence Against Women Act (VAWA), Mr. Levine will examine the correlation between domestic violence and homelessness and outline the ways in which all homeless services providers must be prepared to assist survivors. Session attendees will come away with a better understanding of where VAWA intersects with their programs, particularly CoC- and ESG-funded projects, and how to ensure survivors receive the supports they need to return to safe, stable permanent housing.
