

HOMELESS POINT-IN-TIME COUNT

Summary

The federally mandated count of people experiencing sheltered and unsheltered homelessness on a single night in Riverside County was conducted January 22, 2025. The data collected is used to demonstrate the need for services, to support resource planning, and to inform the community about homelessness.

2 Lack of Income 19%

3 Unemployment 12%

Total Point In Time Data

3,990 1 7% increase from 2023 PIT Count

Highlights:

Sheltered increase reflects increased program participation in CALWORKS and system-wide capacity growth

All major subpopulations —Veterans, Youth, Families, and Seniors— have decreased rates of unsheltered homelessness, while shelter access has continued to grow across those same groups.

For every 2 people entering homelessness for the first time, 3 individuals were housed and maintained stable housing.

More individuals are sheltered than unsheltered, showing real momentum toward **stability and support**.
