12. Appendix D: Misconceptions about PIT Counts.....	94
13. Appendix E: HUD Youth Homeless Definition.....	96

## ACKNOWLEDGEMENTS

The County of Riverside Department of Public Social Services (DPSS) Director, Susan von Zabern, and Assistant Director, Lisa Shiner, along with the 2017 Point-In-Time Homeless Count (PIT Count) Planning Team would like to thank all of the individuals and agencies who contributed their time, money, staff, and effort toward this important event. Coordinating the PIT Count is a massive undertaking. We would not have been able to conduct this count and survey without the participation of many community-based organizations and agencies.

We extend our sincerest appreciation to our public volunteers and the agencies that allowed their staff to volunteer for the PIT Count:

ABC Recovery Center	City of Lake Elsinore
All Saints Episcopal Church	City of La Quinta
Atrium Sober Living	City of Menifee
Banning Family Community Health Center	City of Moreno Valley
Banning Police Department	City of Murrieta

We also would like to provide a special acknowledgement to Riverside Sheriff's Department Chief Jason Horton and Jurupa Valley Station's Lieutenant Robert Spivacke and the Riverside County Sheriff's Homeless Outreach Team, Deputy Aaron Avila and Deputy Bridgette Recksiek, for their leadership, partnership and contributions for coordinating and providing technical support to the Riverside Sheriff's Homeless Liaisons and other police department liaisons during the planning phase preceding the Count.

Thank you to all city leaders for working to increase public awareness about the Riverside County PIT Homeless Count. We express our deep gratitude to the individuals and organizations who donated money, personal care items, and services to the county-wide PIT Homeless Count, including, but not limited to:

HomeAid Inland Empire  
 Valley Restart  
 Starbucks  
 Menifee Valley Community Cupboard  
 San Geronio Girl Scout Troup 284

Sage Dentistry  
 Power Speaks Louder  
 McDonalds Restaurants (Shalhoub Family)  
 San Geronio Girl Scout Troop 176  
 Anna Hause Elementary School, Beaumont,  
 CA - Early Act Club & Friday Night Live Kids  
 Club

These generous donations contributed to 2,200 incentive bags which included a pair of socks, a bar of soap, a resource card, a knit cap, a pair of gloves and additional incentives targeted to unaccompanied youth. These incentive bags were given to homeless individuals who completed our survey during the unsheltered street-based and service-based counts on January 24, 2017.

Finally, we would like to thank: Members of the Continuum of Care (CoC) for their insightful comments and feedback regarding the preliminary PIT Count data; The Institute for Urban Initiatives for serving as an ad hoc consultant throughout the PIT Count process; Riverside County Information Technology for their incredible turnaround time generating maps that were distributed to volunteers during the PIT street-based count; and Riverside County DPSS Purchasing Department for quickly processing all PIT Count-related purchase requests.

The 2017 PIT Count was planned, coordinated and implemented by the Riverside County DPSS, Adult Services Division, Homeless Programs Unit.

## EXECUTIVE SUMMARY

The 2017 Point-In-Time Homeless Count and Survey (PIT Count), conducted on January 24, 2017, identified **1,638 unsheltered** and **768 sheltered** homeless people (**total = 2,406**) in Riverside County, California. **The total Point-In-Time Count increased by 11% from 2016 to 2017.** Data collected during the count reflects a snapshot of Riverside County's homeless population at one particular point-in-time.

***The total  
Point-In-Time  
Homeless Count  
increased by 11.5%  
from 2016 to 2017***

The 2017 unsheltered count methodology consisted of a street-based count, service-based count, and a homeless outreach count conducted by the Riverside University Health System - Behavioral Health homeless outreach teams. A total of 498 volunteers were deployed across Riverside County to successfully count and survey the unsheltered homeless population. PIT Count data was deduplicated using an algorithm to generate a unique ID for each individual counted which utilized several fields of information from the survey. This process allowed data analysts to easily identify and eliminate duplicate records using a statistical database program. Compared to the 2016 PIT Count, the number of unsheltered homeless people **increased by 21.2% in 2017 to 1,638**. Among the 1,638 unsheltered individuals counted in 2017, 1,128 were interviewed and 510 were observed.

***The total  
unsheltered  
homeless people  
counted increased  
by 21.2% in 2017  
to 1,638***

The sheltered count methodology consisted of data extracted from the Homeless Management Information System (HMIS) to identify sheltered homeless individuals on the night of January 23, 2017. Compared to the 2016 PIT Count, the number of sheltered homeless people **decreased by 5.7% in 2017 to 768**. The increase in the overall unsheltered 2017 PIT Count reflects an actual increase in our homeless population and a countywide commitment to conducting a more collaborative and rigorous count. Based on feedback provided to the County of Riverside Department of Public Social Services (DPSS), the increase may be attributed to the following:

***The total sheltered  
homeless people  
counted decreased  
by 5.7% in 2017 to  
768***

- ✚ In 2017, following HUD's new requirements to have a separate youth count, efforts to obtain a more accurate count of youth ages 24 and under that are experiencing homelessness were increased. Youth friendly partners were invited to assist in implementing the youth count. These partners included: youth opportunity centers, transitional age youth programs, youth emergency shelters, city leaders, and other public, private, and non-profit agencies focused on the goal to end homelessness for youth. The knowledge and experience that each collaborative partner brought to the table helped us better identify homeless youth during both the traditional and the youth counts. By having youth friendly volunteers, youth experiencing homelessness were more willing to participate in the PIT Survey. The total 2017 count for youth ages 24 and under is 193 (interview and observational); a 103% increase from last year's count. This increase is likely due to an increased collaboration and focus on youth experiencing homelessness.
- ✚ For the 2017 Point in Time Count, there was a targeted countywide effort to significantly increase city engagement activities and the participation of law enforcement agencies working on the frontlines to end homelessness. This enhanced partnership included the Riverside County Sheriff's Department, various City Police Departments, Riverside County and City Code Enforcement agencies, Riverside County Probation Department, DPSS Homeless Programs Unit, Housing Authority of the County of Riverside, The Riverside University Health System – Behavioral Health (formerly Department of Mental Health), the U.S. Department of Veterans' Affairs (VA), Loma Linda Medical Center, and other key nonprofit housing providers. These coordination efforts helped to improve planning activities through the pre-canvassing of communities to identify more accurate homeless locations. There was also an increased commitment from community partners to conduct a more accurate count by conducting follow up counts during the seven day window following the PIT Count date.
- ✚ Riverside County was under a severe thunderstorm warning by the National Weather Service in the weeks and days leading up to the PIT Count. In addition, the region received amounts of rain that were record-breaking in the days before the PIT Count, including the day before. As the majority of Riverside County's unsheltered homeless population resides in unsheltered settings, a partnership with first responders to raise awareness for the PIT Count and to promote the outreach services for homeless veterans, youth and families taking place on the day of the Count had a significant impact. This message was layered onto an existing safety advisory initiated by first responders to warn homeless individuals of the dangers of residing in riverbeds, flood control channels and areas prone to mudslides during thunderstorms. This countywide effort between partnering county agencies helped to:
  - Raise awareness and educate the homeless population of the benefits of participating in the Count;
  - Educate the most service-resistant individuals residing in hard to reach areas; and
  - Reinforce a common purpose to bring homeless individuals out of the shadows and promote a common message not to fear law enforcement personnel escorting PIT Count volunteers into encampments.

Homeless individuals that heeded the law enforcement/emergency management warning either sought shelter in drier areas or felt safe to participate in the survey, thus increasing the number of individuals surveyed during the entire PIT Count.

✚ During the 2017 PIT Count, there was a 65% (201) increase in the number of observational surveys utilized compared to 2016. The U.S. Department of Housing and Urban Development (HUD) makes provisions for using an observational survey instead of an interview survey in the following situations:

- PIT Count volunteer is unable to enter the location to conduct a survey.
- PIT Count volunteer cannot conduct a survey (person refused to answer questions, language or other issues).
- PIT Count volunteer does not wish to disturb people who are sleeping.

However, due to the limited amount of information collected on the observational survey and the fact that it includes the volunteer's perspective as opposed to the homeless individual's response, it makes the deduplication process challenging. Even though every effort is made to remove duplicates, there is no guarantee that some of the individuals observed may or may not have been interviewed at another time during the PIT Count.

Riverside County's Department of Public Social Services (DPSS), in partnership with the County of Riverside Continuum of Care continues to explore new and innovative strategies for conducting a successful PIT Count in 2017 and beyond.

# INTRODUCTION

The Point-In-Time (PIT) Homeless Count is a count and survey of Riverside County's sheltered and unsheltered homeless population. Riverside County's Department of Public Social Services (DPSS), in partnership with County of Riverside Continuum of Care, is required to conduct this biennial count during the last 10 days in January. The Continuum of Care (CoC) is a network of private- and public-sector homeless service providers, designed to promote community-wide planning and the strategic use of resources to address homelessness.

The PIT Count is federally-mandated by the U.S. Department of Housing and Urban Development (HUD) to count and survey the homeless population in cities and counties throughout the nation, including Riverside County. Each count is planned, coordinated, and carried out locally. Data collected during the Count reflects a *snapshot* of Riverside County's homeless population at one particular point-in-time and is required in order to: continue receiving federal funding for homeless assistance programs, develop strategies to end homelessness, help homeless individuals and families who are in need, and produce a full report to HUD regarding the homeless individuals in Riverside County. In 2016, Riverside City and County received a total of **\$9.9 million** by HUD for the Continuum of Care Program for homeless programs and services.

HUD defines a person who is homeless as: (a) living in a place not designed or ordinarily used as a regular sleeping accommodation for humans (i.e., abandoned buildings, cars, parks, under bridges, bus stops, etc.); and (b) living in emergency shelters and transitional housing projects<sup>1</sup>. It is important to note that HUD's definition does not include households that are below the poverty line or those individuals that are near-homeless. In addition, HUD identifies people to exclude from the count<sup>2</sup>:

- (a) Persons counted in any location not listed on the CoC's Housing Inventory Count (HIC);
- (b) Persons residing in permanent housing (PH) programs, including persons housed using HUD Veterans Affairs Supportive Housing (VASH) vouchers;
- (c) Persons temporarily staying with family or friends (i.e., "doubled-up" or "couch surfing");
- (d) Persons residing in housing they rent or own (i.e., permanent housing), including persons residing in rental housing with assistance from a RRH project on the night of the count; and
- (e) Persons residing in institutions (e.g., jails, juvenile correction facilities, foster care, hospital beds, detox centers).

<sup>2</sup> 2014 Point-In-Time HUD Methodology Guide, p. 30

# METHODOLOGY

## Overview

The 2017 Point-In-Time (PIT) Homeless Count unsheltered methodology consisted of the following primary components:

- a) Street-based count on January 24, 2017 between 5:30 a.m. to 9:30 a.m.
- b) Service-based count on January 24, 2017 between 7:00 a.m. to 2:00 p.m.
- c) Riverside University Health System - Behavioral Health (RUHS-BH) Homeless Outreach between January 24, 2017 – January 30, 2017 (seven-day period of time to cover unincorporated areas and perform a sweep of city areas to count and survey homeless individuals missed on January 24, 2017.)
- d) Follow-up Count and Survey during the seven day post-count window (City and County staff, volunteers and Riverside County Sheriff's deputies (seven day period between January 24, 2017 – January 30, 2017 to count and survey homeless individuals in cities and unincorporated areas missed on January 24, 2017.)
- e) Unaccompanied Youth (age 24 or under) street-based and service-based counts between January 24, 2017 – January 30, 2017 (seven-day period of time to cover targeted unaccompanied youth homeless locations.)

The 2017 PIT Count unsheltered methodology was similar to the 2016 PIT Count unsheltered methodology, with the exception of the HUD mandated separate Youth Count conducted in 2017. Although a separate Youth Count was not conducted in 2016, youth were identified and counted during the street-based, service-based, and sheltered counts. See Table 1 below for a comparison of PIT Count methodology.

**Table 1: Comparison of PIT Count Unsheltered Methodology**

2016	2017
Street-based count	Street-based count
Service-based count	Service-based count
Riverside University Health System - Behavioral Health Homeless Outreach (seven-day period of time to cover the unincorporated areas and perform sweep of cities to count and survey missed people)	Riverside University Health System – Behavioral Health Homeless Outreach (seven-day period of time to cover the unincorporated areas and perform sweep of cities to count and survey missed people)
	Follow-up Count and Survey during the seven day post-count window (City and County staff, volunteers and Riverside County Sheriff officers (seven day period between January 24, 2017 – January 30, 2017 to count and survey homeless individuals in cities and unincorporated areas missed on January 24, 2017.) This was due to the unprecedented rainstorms in the region prior to the Count.
	Youth Count (seven day period to cover targeted homeless unaccompanied youth locations)

Subsequent sections will further compare the 2016 and 2017 PIT Count unsheltered methodologies. In both 2016 and 2017, specific attention was given to city engagement and survey development as opportunities to increase the accuracy of the PIT Count.

## City Engagement

The methods of city engagement used in 2017 paralleled the methods used in 2016. DPSS made efforts to engage city leaders, law enforcement personnel, and establish deployment centers in each city. A thorough list of unincorporated communities was incorporated into the street-based count. City leaders who requested further assistance were assigned a DPSS Site Coordinator to support PIT Count activities on the day of the PIT Count. These DPSS Site Coordinators worked in tandem with city leaders. Their role was primarily to assist the city leaders who were in charge at each deployment center during the street-based count. It is important to note that some city leaders elected not to use a DPSS Site Coordinator as they felt confident with their abilities and available resources to conduct the count. See Table 2 below for a comparison of city engagement.

**Table 2: Comparison of City Engagement**

City Engagement	
2016	2017
27 out of 28 cities participated in the Count and had deployment centers in the city or a neighboring city	27 out of 28 cities participated in the Count and had deployment centers in the city or a neighboring city

## Survey Development

### Interview Survey Tools

The survey that was selected for implementation was a slightly modified version of the 2016 Count and Survey tool based on the feedback from volunteers to improve the previous version. The survey was pilot tested to assess whether prospective volunteers knew how to navigate the survey tool comfortably and whether prospective interviewees clearly understood the questions that were asked.

In 2017, an additional interview survey was developed for the Youth Count. The Youth Interview Survey incorporates most of the information included on the traditional PIT Count Survey and additional questions targeted specifically to homeless youth.

A total of 40 people piloted the survey tools including: DPSS Adult Services Division Administration staff, community members, and sheltered homeless individuals. In addition, general survey feedback was given by the RUHS-BH. The version that received the most positive feedback was selected for interviewing homeless individuals during the street-based count and the service-based count.

### Observational Survey Tools

The primary goal for the PIT Count was to *interview* each homeless person. However, it was understood interviewing was not feasible under certain circumstances. Thus, an observational survey tool was developed to allow interviewers to record observational data (perceived gender, ethnicity, age, physical description, etc.) for individuals encountered during the street-based count who were suspected to be homeless and were unable or unwilling to be engaged. This observational technique is acceptable according to HUD guidelines<sup>3</sup>.

<sup>3</sup> 2014 Point-In-Time HUD Methodology Guide, p. 52

The following are reasons that volunteers used an observational tool:

- there were barriers to enter the site
- the site was unsafe to enter
- the person refused to participate
- the person was sleeping
- there was a language barrier
- the person was unable to respond (i.e., mental issues, intoxication, etc.)

This observational tool was used during the general PIT street-based count. In 2017, an additional observational survey was developed for the Youth Count. The youth observational survey tool incorporates most of the information included on the traditional PIT Count survey tool along with additional questions targeted specifically toward homeless youth.

## Data Entry and Deduplication Method

A Microsoft Access application was created in order to consolidate and store the unsheltered homeless count survey data. Separate applications were created for the street-based interview surveys and street-based observational surveys. Five data entry volunteers entered this unsheltered homeless data into the Microsoft Access application during the month of February.

Since the 2017 PIT Count involved both street-based and service-based counts, a deduplication method was implemented to account for any individuals who may have been interviewed multiple times. The deduplication method for the interview surveys consisted of creating a unique identifier using several fields of information from the survey, such as: first initial, last initial, birth month, birth year, city born, state born, gender, race, and veteran status. The deduplication method for the observational surveys used the following fields to create a unique identifier: reason for observational tool, type of location, age observed, perceived gender, and perceived race. The creation of the unique identifier was conducted in a statistical database program (Microsoft Access), using an algorithm with the identified demographic information to generate a unique ID for each individual counted. This process allowed data analysts to easily identify and eliminate duplicate records.

Table 3 below shows that the total number of street-based (interview and observational tools) and service-based interview surveys returned to DPSS was 1,892 (1,149 interview, 222 youth surveys, 521 observational). During the data entry process, several survey errors were discovered.

*Surveys were rejected prior to data entry for the following reasons:* (a) the survey was completely blank except for interviewer name and location; (b) the homeless individual indicated that they stayed in a place the night before that was not considered *unsheltered* according to HUD (house, apartment, emergency shelter, motel, etc.); or (c) the homeless individual indicated they had already been surveyed. There were 242 surveys that were rejected prior to being entered into the database. These criteria resulted in a new subtotal of 1,650 surveys. The PIT Count's analytic rationale was to include all

records until there was clarity and certainty that they should be excluded. Once all data was entered and the deduplication method implemented, twelve surveys were rejected as duplicates, resulting in a final sample size of 1,638 individuals. See Table 3 below for the numeric breakdown and filtering process.

**Table 3: Breakdown of PIT Count Surveys – Data Cleaning and Deduplication**

Total Surveys Returned	Rejected Surveys (Not Entered)	New Sub Total	Rejected Surveys (Duplicates)	Final Sample Size (total number of people)
<b>1,892</b> (1,149 interview, 222 youth surveys, 521 observational)	<b>242</b> (91 interview, 140 youth, 11 observational)	<b>1650</b> (1058 interview, 82 youth surveys, 510 observational)	<b>12</b> (8 interview, 4 youth, 0 observational)	<b>1638</b> (1050 interview, 78 youth surveys, 510 observational)

Since the observational surveys contained less information and therefore fewer fields to use in the deduplication process, it was challenging to rationalize the drop of any *potential* duplicates in this data. For example, if two different volunteers were instructed to record their observations regarding the same scenario, they would likely describe the scenario in two completely different ways. Thus, there would be no certainty that the individuals observed in the scenario were the same individual or different individuals. Therefore, it was decided to include all observational surveys. Throughout the rest of the report, the results will be discussed in terms of interview survey data versus observational survey data. It is important to make this distinction as the interview survey data is based on the respondent's own self-identification, while the observational survey data is based on the volunteer's perceptions.

Extrapolation techniques are not incorporated into this report. The 2017 PIT Count reflects only individuals who were counted (through direct observation or interviewed), rather than estimated based on tents or belongings.

It was not feasible to deduplicate the interview and observational data together because, again, the interview data was based on self-identification while the observational data was based on volunteer perception. Therefore, none of the fields from these two different surveys were identical, making it nearly impossible to deduplicate across survey types.

## Volunteer Recruitment

Four hundred and ninety eight volunteers were recruited through the following methods:

- ✚ email blasts
- ✚ outreach to faith-based organizations
- ✚ local colleges and universities;
- ✚ press releases published in several print and online newspapers throughout Riverside County
- ✚ volunteer trainings which ran from January 3, 2017 to January 20, 2017
- ✚ printed flyers distributed at various agencies and collaborative meetings

A web-based survey (SurveyMonkey) was used to keep track of volunteer registrations. PIT Count volunteers provided assistance in the following ways:

- Served as enumerators in the street-based count on January 24, 2017, between 5:30 a.m. and 9:30 a.m.
- Helped DPSS identify locations in Riverside County where homeless individuals and families were known to live and congregate
- Donated items to be used in the incentive bags given to homeless individuals who were surveyed

All volunteers were required to complete a 90-minute onsite or online volunteer orientation where they received instructions on how to conduct the count and on important safety guidelines.

## Unsheltered Homeless Count

### Street-Based Count

The street-based count took place on January 24, 2017, between 5:30 a.m. and 9:30 a.m. A total of volunteers were divided into small groups and deployed across Riverside County to pre-identified locations where homeless people were known to live and/or congregate. Volunteers served as team leaders, lookouts, or counters and met at one of the deployment centers across the county to receive their team assignments, surveys, supplies, and maps.

In 2017, the Riverside County Sheriff law enforcement teams worked with designated crime analysts to produce maps with the known locations of homeless individuals throughout Riverside County. Based on the analysis of the homeless locations identified and the general coverage areas, city and law enforcement leaders were able to estimate the effective number of volunteer count teams needed to address the entire coverage areas.

## Service-Based Count

The service-based count took place on January 24, 2017, between 7:00 a.m. and 2:00 p.m. Several weeks prior to the count, DPSS staff compiled a list of agencies that provide services to homeless people throughout Riverside County. The list was compiled using several resources, including:

- a list of service agencies that the DPSS Homeless Programs Unit had on hand
- an internet search
- Riverside County's Continuum of Care

Though efforts were taken to compile a comprehensive list, this list is by no means exhaustive. Once the final list was completed, contact was attempted with each organization. The goal of contacting each organization was to verify the agency name, contact information, operational hours, and to assess each agency's interest level and how many estimated volunteers would be needed. All agencies that operated between the hours of 7:00 a.m. and 2:00 p.m. on Tuesdays were contacted or attempts were made. The remaining agencies were classified into four categories: information unconfirmed; willing to administer surveys with agency staff; willing to have volunteers administer surveys at facility; or not interested in participating.

## Behavioral Health Homeless Outreach Count

Riverside University Health System – Behavioral Health Homeless Outreach (RUHS-BH) teams used the departments' Housing Crisis Response teams (16 staff) to assist in the count to canvass non-city (unincorporated) areas throughout Riverside County. RUHS-BH performed their primary unsheltered counts of non-city areas on the day of the Count, and also performed a follow-up sweep during the seven-day period afterward, as allowed by the HUD methodology<sup>4</sup>

The RUHS-BH staff was also encouraged to count and survey homeless clients who were receiving services at Behavioral Health Clinics throughout the county. The coverage they provided to the non-city areas included both (a) reconnaissance prior to the PIT Count to assess if particular areas had homeless people; and (b) surveying the individuals they found during their reconnaissance at a later date (but within the seven-day window following the PIT Count). The Housing Crisis Response teams canvassed the areas to assess the presence of individuals living on the streets or in uninhabitable locations. The reconnaissance efforts began the month prior to the Count; increasing in frequency over the week before the Count; and then continued every day leading up to the Count. If no individuals living on the street were identified in a particular area, RUHS-BH teams returned for one last round of reconnaissance two days prior to the Count date. If RUHS-BH found, or knew of, suspected homeless individuals in a particular area, they returned on the day of the Count (or the seven day period following the Count date) to administer the survey. On the day of the Count, RUHS-BH teams surveyed

---

<sup>4</sup>A survey of people at various social service locations or other public or private locations to identify people who were unsheltered, but not counted, on the night of the count--either because CoC's did not use a night of the count approach or because unsheltered people were missed on the night of the count. Service-based counts may only be conducted within the seven-day period after the designated count night.

the locations with known homeless and then surveyed the remaining locations over the next seven days, ensuring that every known or encountered homeless individual had been counted and/or surveyed. The deduplication method was implemented to account for any individuals who may have been interviewed multiple times.

### **Follow-up Count During Seven Day Window**

For weeks and days leading up to the PIT Count, there were severe thunderstorms which affected the riverbeds, flood control channels and areas prone to mudslides in which homeless individuals resided. On the day of the PIT Count, many of these locations were vacated due to the severe weather conditions. Subsequently, the PIT methodology was expanded to afford city leaders and law enforcement personnel the opportunity to conduct a follow up Count during the seven day window to count and survey homeless individuals that may have been missed on the PIT Count date. The deduplication method was implemented to account for any individuals who may have been interviewed multiple times.

### **Youth Count**

Beginning in 2017, HUD mandated that all Continua of Care (CoCs) conduct a Youth Point in Time Count. A separate Count is required because youth experiencing homelessness congregate in different locations and at different times than older adults; youth often do not want to be found, and youth do not often think of themselves as being homeless.

The purpose of the Youth Count is to:

- Identify how many youth under age 24 are homeless on a given day in Riverside County;
- Determine the need for youth homeless services; and
- Guide decisions about how to use available resources.

The Youth Count will provide essential data for planning and developing community interventions to meet the goal of preventing and ending homelessness in families, children and youth by the year 2020, as established by the federal Opening Doors strategy.

Although youth experiencing homelessness or at-risk for homelessness were counted, only those that were “literally homeless” according to HUD guidelines are included in the official unsheltered counts within this report (See Appendix E).

The County of Riverside CoC conducted a Youth PIT Count and Survey in partnership with the Department of Public Social Services, Riverside University Health System – Behavioral Health TAY Program, and Operation Safehouse. The street-based and service-based counts took place during the seven-day window between January 24, - January 30, 2017. Partnering youth agencies led their own teams of trained, youth-friendly staff and volunteers to conduct the Youth Count and Survey at various locations throughout Riverside County.

### **Sheltered Homeless Count**

As required by HUD, the sheltered Count involved counting homeless individuals and families who stayed in emergency shelters and transitional housing on the night of January 23, 2017. The sheltered Count was conducted in accordance with HUD's counting standards and methodology guidance. The Homeless Management Information System (HMIS) data was used to generate the sheltered Count and subpopulation data for projects with one hundred percent of beds participating in HMIS.

In preparation for the 2017 Housing Inventory Count (HIC) and the Point-in-Time Count (PIT), the HMIS Administrators Council, HMIS participating agencies and users were provided with training and resources on data collection processes and requirements. The training emphasized the users' responsibilities for ensuring data quality – accuracy, completeness and timeliness – that included entering entry and exit dates into HMIS prior to the assigned deadline.

For non-HMIS participating agencies and domestic violence shelter providers, a survey form was provided to fill in demographic and household data. This information was used to complete the population reporting requirement. The survey included a definition of terms and detailed instructions to ensure data verification and data quality standards were met.

# UNSHELTERED COUNT FINDINGS

## Overview

There were a total of 1,638 individuals counted during the 2017 unsheltered homeless count. Table 4 displays the overall data by city or unincorporated area. When presenting any data below, please note that there is a distinction between observational data (based on volunteer perception) and interview data (based on respondent's self-identification), as discussed earlier in the report.

The total column for 2017 represents a summation of the interview and observational data. Both the total count for each city and the respective percentage of the total number of unsheltered homeless people in Riverside County are provided. Table 4 also compares the 2017 city counts to the 2016 city counts. In the final column on the right of the table is the percent change between 2016 and 2017. It should be noted that this comparison does *not* take into account the total sample sizes for each year. The comparative data is presented this way in order to show the raw change in unsheltered homeless counts for each city or unincorporated area from 2016 to 2017.

**Table 4: Unsheltered Homeless Count by City and Type of Data**

\*Note: 2017 PIT comprehensive final data. There may be slight variations between the preliminary numbers and the data contained in this report. Only unincorporated communities with a 2016/2017 unsheltered count greater than zero are included.

## Reasons Contributing to Homelessness

In 2017, at the recommendation of city officials and representatives from the Riverside County Continuum of Care (CoC), a new question was added to the interview survey tool in order capture the primary reasons for individuals becoming homeless within Riverside County. Among the unsheltered homeless population, 33% selected unemployment as a primary reason for homelessness (n = 347); 27% selected lack of income for housing as a primary reason for homelessness (n = 288); 4% selected fleeing domestic violence as a primary reason (n = 44); 3% selected discharge from medical institution as a primary reason (n = 31); 8% selected discharged from jail or prison as a primary reason (n = 79); 8% selected mental illness as a primary reason (n = 84); 7% selected runaway and/or left home as a primary reason (n = 69). See Table 5 below for full details on these unsheltered subpopulations.

**Table 5: 2017 Primary Reasons for Becoming Homeless**

Primary Reasons for Becoming Homeless	Count	Percentage %
Unemployment	347	33%
Lack of income for housing	288	27%
Fleeing domestic violence	44	4%
Discharged from medical institution	31	3%
Discharged from jail or prison	79	8%
Mental Illness	84	8%
Runaway/left home	69	7%
Other	368	35%

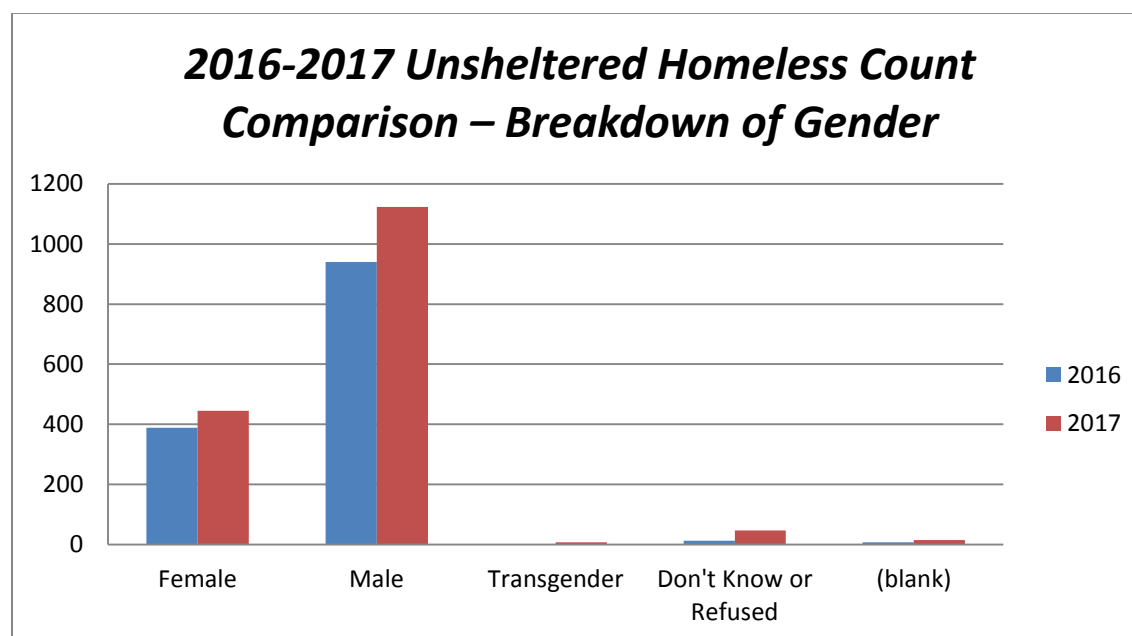

## Gender

Of the 1,638 unsheltered homeless people, a majority (69%) of these individuals were men (n = 1123) and (27%) of these individuals were female (n=445). See Table 6 below for full details. Table 6 also compares the 2016 to the 2017 gender subpopulation counts. In the final column on the right of the table is the percent change between 2016 and 2017. It should be noted that this comparison does not take into account the total sample sizes for each year. The comparative data is presented this way in order to show the raw change in unsheltered homeless gender counts from 2016 to 2017.

**Table 6: 2016-2017 Unsheltered Homeless Count Comparison – Breakdown of Gender**

Gender	2017 General PIT Count		Unsheltered Totals				2016-2017	2016-2017

<b>Total</b>	<b>1128</b>	<b>510</b>	<b>1351</b>	<b>-</b>	<b>1638</b>	<b>-</b>	<b>287</b>	<b>-</b>

\*Note: Interview data is based on respondent's self-identification while observational data is based on volunteer perception.

**Figure 1: 2017 Unsheltered Homeless Count – Breakdown of Gender**

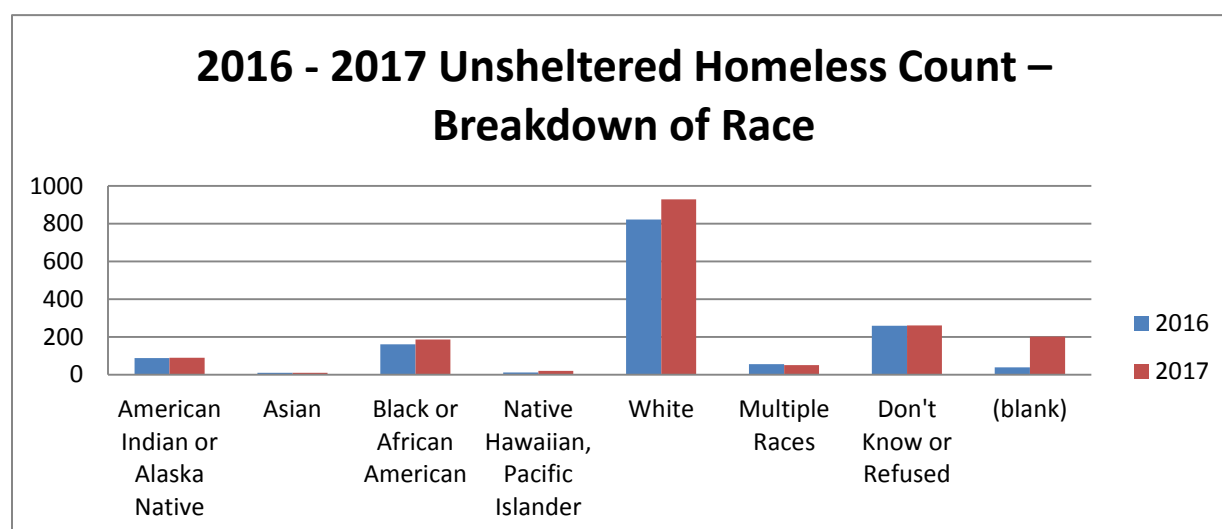

## Race and Ethnicity

A majority (57%) of the unsheltered homeless population either identified or were observed as White (n = 928); (11%) either identified or were observed as African American (n=186); (5%) either identified or were observed as American Indian or Alaskan Native (n=89); (1%) either identified or were observed as Native Hawaiian or Pacific Islander (n=20); (1%) either identified or were observed as Asian (n=10); (3%) either identified or were observed as Multiple Races (n=50); (See Table 7 below). Approximately (28%) of the population either identified as or were observed as Hispanic or Latino (n=465) (See Table 8

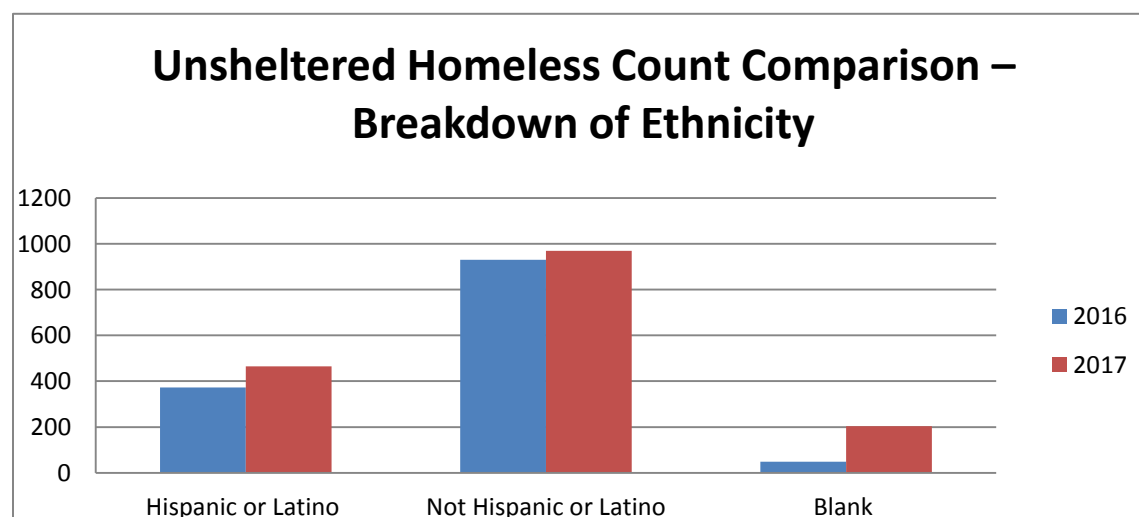

below). Ethnicity was assessed in a separate question than race as HUD considers Hispanic to be an ethnicity, not a race. See Table 7 and 8 for full details regarding the 2016 to the 2017 race and ethnicity subpopulation comparison. In the final column on the right of the table is the percent change between 2016 and 2017. It should be noted that this comparison does not take into account the total sample sizes for each year. The comparative data is presented this way in order to show the raw change in unsheltered homeless race counts from 2016 to 2017.

**Table 7: 2016-2017 Unsheltered Homeless Count Comparison – Breakdown of Race**

Race	2017 PIT Count		Unsheltered Totals				2016-2017

**Figure 3: 2016-2017 Unsheltered Homeless Count – Breakdown of Ethnicity**

## Age

The majority of the 2017 unsheltered homeless population was between the ages of 50-61 (n = 403) and 40-49 (n = 318). See Table 9 for full details regarding age. Table 9 also compares the 2016 to the 2017 age subpopulation counts. In the final column on the right of the table is the percent change between 2016 and 2017. It should be noted that this comparison does not take into account the total sample sizes for each year. The comparative data is presented this way in order to show the raw change in unsheltered homeless age counts from 2016 to 2017.

**Table 9: 2016-2017 Unsheltered Homeless Count Comparison – Breakdown of Age**

Age Range	2017 PIT Count		Unsheltered Totals				2016-2017	
	Interview	Observational	2016		2017		Count Change	Percentage Difference

**Figure 4: 2016-2017 Unsheltered Homeless Count – Breakdown of Age**

## Veterans

Most of the unsheltered homeless individuals were not veterans. Table 10 compares the 2016 to the 2017 veteran and chronically homeless veterans that were counted.

**Table 10: 2017 Unsheltered Homeless Count – Veterans**

Veterans	2016		2017		2016-2017	
	Count	Percent	Count	Percent	Count Change	Percentage Difference
Unsheltered Homeless Veterans	100	7.40%	91	5.56%	-9	-9.00%
Unsheltered Chronically Homeless Veterans	36	2.66%	37	2.26%	1	2.78%

## Youth

Among the unsheltered homeless population, 12% were considered homeless youth under the age of 25 (n = 193) according to HUD's "literally homeless" definition. Unaccompanied homeless youth must not be in the physical custody of a parent or guardian. Table 11 provides a breakdown of these unsheltered youth subpopulations.

**Table 11: 2017 Unsheltered Youth Count – Age 24 and Under**

	2016		2017		2016-2017	
	Count	Percent	Count	Percent	Count Change	Percentage Difference
<b>Unaccompanied Minor Youth (17 and Under)</b>	1	0.07%	11	0.67%	10	1000.00%
<b>Unaccompanied Transitional Age Youth (24 and Under)</b>	81	6.06%	171	10.43%	90	111.11%
<b>Total Minor Youth (17 and Under)</b>	13	0.96%	15	1.00%	2	15.38%
<b>Total Transitional Age Youth (24 and Under)</b>	82	6.06%	178	10.87%	96	117.07%

*\*Note:* This information was obtained from the interview and observational surveys that meet the HUD definition of homeless youth. Additional details regarding youth population will be published in a separate Youth Count Addendum.

## Subpopulations

Among the unsheltered homeless population, 30% were considered chronically homeless (n = 341); 18% were recently released from jail or prison (n = 202); and 25% were victims of domestic violence (n = 282). See Table 12 below for full details on these unsheltered subpopulations. Table 12 also compares the 2016 to the 2017 subpopulation counts. In the final column on the right of the table is the percent change between 2016 and 2017. It should be noted that this comparison does not take into account the total sample sizes for each year. The comparative data is presented this way in order to show the raw change in unsheltered homeless subpopulation counts from 2016 to 2017.

**Table 12: 2016-2017 Unsheltered Homeless Count Comparison – Breakdown of Subpopulations**

Subpopulation	2016		2017		2016-2017	
	Count	Percent	Count	Percent	Count Change	Percent Change
<b>Chronically Homeless</b>	299	25.95%	341	30.23%	42	14.05%
<b>Families with Children</b>	8	0.69%	3	0.29%	-5	-62.50%
<b>Veterans</b>	100	8.68%	91	8.07%	-9	-9.00%
<b>Youth 24 or younger</b>	95	8.25%	193	17.11%	98	103.16%
<b>Alcohol Use</b>	273	23.70%	291	25.80%	18	6.59%
<b>Drug Use</b>	341	29.60%	461	40.87%	120	35.19%
<b>PTSD</b>	200	17.36%	268	25.52%	68	34.00%
<b>Mental Health Conditions</b>	275	23.87%	309	27.39%	34	12.36%
<b>Physical Disability</b>	326	28.30%	362	34.48%	36	11.04%
<b>Developmental Disability</b>	128	11.11%	135	11.97%	7	5.47%
<b>Brain Injury</b>	201	17.45%	212	20.19%	11	5.47%
<b>Victim of Domestic Violence</b>	265	23.00%	282	25.00%	17	6.42%
<b>AIDS or HIV</b>	11	0.95%	21	1.86%	10	90.91%
<b>Jail (within 12 months)</b>	223	19.36%	202	17.91%	-21	-9.42%

*\*Note:* All subpopulations with the exception of Youth 24 or younger are obtained from the interview surveys (not observational surveys). Youth 24 or younger count is obtained from interview and observational surveys. Chronically homeless was defined according to HUD's definition if the person had been living in emergency shelter and/or on the streets (a) for the past year or more or (b) four or more times during the last three years and who may have a disability (HUD HEARTH Act Interim Rule, pgs. 53-54). Jail was defined as someone who was released from jail or prison within the past 12 months. An individual could potentially be categorized into multiple or all subpopulations.

Among the unsheltered homeless population, 26% reported using alcohol (n = 291), 41% reported using drugs (n = 461), 26% reported suffering from Post-Traumatic Stress Disorder (PTSD) (n = 268), 27% reported having a mental health condition (n = 309), 34% reported having a physical disability (n = 362), 12% reported having a developmental disability (n = 135), and 20% reported suffering from a brain injury (n = 212). Among those individuals who reported experiencing these situations, almost half of them indicated that PTSD (51%), physical disabilities (50%), mental health conditions (44%), and developmental disabilities (43%) prevented them from obtaining stable housing or a steady job. It is important to note that an individual could potentially be categorized into multiple or all subpopulations. Table 13 also compares the 2016 to the 2017 subpopulation counts.

**Table 13: 2016-2017 Unsheltered Homeless Count Comparison – Breakdown of Disabling Conditions**

Disabling Conditions	Number of respondents who stated they have experienced...				Number of respondents who stated it prevents them from obtaining housing or work.			
	2016		2017		2016		2017	
Subpopulation	Count	Percent	Count	Percent	Count	Percent	Count	Percent
Alcohol Use	273	26.20%	291	25.80%	61	5.90%	47	4.20%
Drug Use	341	32.70%	461	40.87%	90	8.60%	109	9.70%
PTSD	200	19.20%	268	25.52%	106	10.20%	136	12.10%
Mental Health Conditions	275	26.40%	309	27.39%	144	13.80%	137	12.10%
Physical Disability	326	31.30%	362	34.48%	190	18.20%	181	16.00%
Developmental Disability	128	12.30%	135	11.97%	59	5.70%	58	5.10%
Brain Injury	201	19.30%	212	20.19%	82	7.90%	72	6.40%

Table 14 below displays subpopulation data by city versus unincorporated area. This table provides a highlight of subpopulation information. A count for each city is provided, as well as its corresponding percentage of the total unsheltered sample that had subpopulation data available (n = 1,128). It is important to note that subpopulation information was not collected on the observational tool. Additional subpopulation information for the overall total amount of unsheltered homeless can be found in Table 12.

## SHELTERED COUNT FINDINGS

**Figure 5: 2017 Shelter Total Count Breakdown**

A total of 768 homeless individuals were counted during the sheltered PIT Count. These individuals stayed in emergency shelters (including domestic violence shelters and hotel/motel vouchers) and transitional housing. This represents a 5.7% decrease from the 2016 sheltered count (n = 814). See Table 15 below regarding the 2016 to the 2017 sheltered subpopulation comparison. In the final column on the right of the table is the percent change between 2016 and 2017. The comparative data is presented this way in order to show the raw change in unsheltered homeless race counts from 2016 to 2017.

**Table 15: Sheltered Homeless Count – Subpopulation Data**

Subpopulation	2016		2017		2016-2017	
	Count	Percentage	Count	Percentage	Count Change	Percentage Change
Chronically Homeless Individuals	70	8.60%	77	10.03%	7	10.00%
HIV Positive/AIDS	6	0.74%	10	1.30%	4	66.70%
Mental Health Problems	209	25.68%	206	26.82%	-3	-1.40%
Substance Users (Alcohol or Drug Abuse)	166	20.39%	128	16.67%	-38	-22.90%
Minor Youth (under 18)	166	20.39%	165	21.48%	-1	-0.60%
Accompanied Minor Youth (under 18)	150	18.43%	146	19.01%	-4	-2.70%
Unaccompanied Minor Youth (under 18)	16	1.97%	19	2.47%	3	18.80%
Youth (18-24)	72	8.85%	67	8.72%	-5	-6.90%
Veterans	111	13.64%	57	7.42%	-54	-48.60%
Chronically Homeless Veterans	8	0.98%	8	0.00%	0	-100.00%
Victims of Domestic Violence	108	13.27%	115	14.97%	7	6.50%

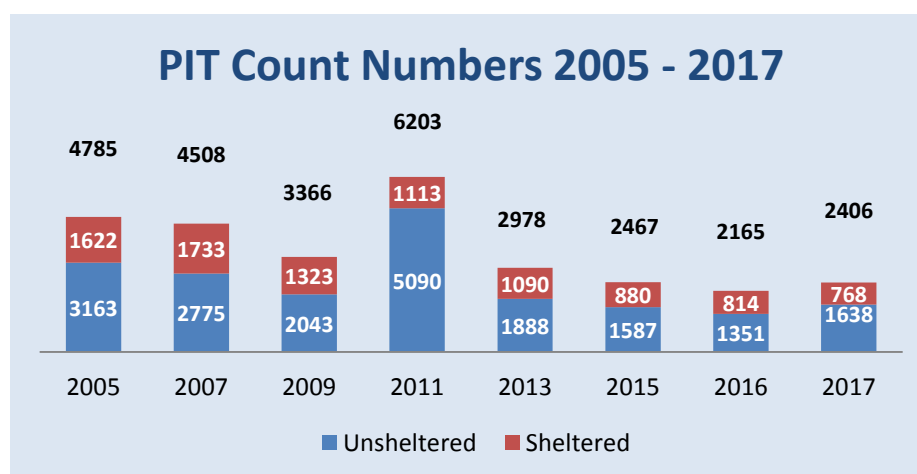

## CONCLUSION

The 2017 Point-In-Time Homeless Count unsheltered methodology consisted of a street-based count, and a service-based count. The sheltered count methodology consisted of data extracted from the Homeless Management Information System (HMIS) to count sheltered homeless individuals on the night of January 23, 2017. A total of 1,638 unsheltered homeless individuals and a preliminary sheltered count of 768 (**total homeless = 2,406**) were identified in Riverside County during the 2017 Point-In-Time Homeless Count on January 24, 2017. In contrast, during the 2016 PIT Count, 1,351 unsheltered and 814 sheltered homeless individuals (total homeless = 2,165) were identified. Therefore, there was an **11%** increase in the overall total number of homeless people counted from 2016 to 2017 (**21.2%** increase in unsheltered homeless; **5.7%** decrease in sheltered homeless). Among the 1,638 unsheltered individuals counted in 2017, 1,128 were interviewed and 510 were observed. The increase in the overall unsheltered 2017 Point-in-Time (PIT) Count reflects an actual increase in our homeless population and a countywide commitment to conducting a more collaborative and rigorous count.

The increase in the size of the general homeless population and most subpopulations may obscure the fact that many individuals' lives have been changed for the better through Riverside County's homeless initiatives. It is important to consider the results of the 2017 Count within the context of local efforts to move individuals and families out of homelessness through the provision of housing and supportive services. Through innovative and effective housing programs and services, Riverside County remains committed to moving persons experiencing homelessness into permanent housing.

The completion of the 2017 Homeless Point-in-Time Count provides required data for federal funding for the Riverside County Continuum of Care (CoC). The data presented in the 2017 Homeless Point-in-Time Count and Survey report will continue to be used by the CoC planning bodies and the City and County of Riverside and other organizations to inform additional outreach, service planning, and policy decision-making over the next year as they continue to address homelessness.

**Figure 6. 2017 Total Homeless Count Comparison – Year-Over-Year**

# CHALLENGES, LIMITATIONS AND RECOMMENDATIONS

## Street Based Count

Riverside County was under a severe thunderstorm warning by the National Weather Service in the weeks and days leading up to the PIT Count. As the majority of Riverside County's unsheltered homeless population resides in unsheltered settings, we partnered with first responders to raise awareness for the PIT Count and to promote the outreach services for homeless veterans, youth and families taking place on the day of the Count. This message was layered onto an existing safety advisory initiated by first responders to warn homeless individuals of the dangers of residing in riverbeds, flood control channels and areas prone to mudslides during thunderstorms. This countywide effort between partnering county agencies helped to:

- Raise awareness and educate the homeless population of the benefits of participating in the Count;
- Educate the most service resistant individuals residing in hard to reach areas; and
- Reinforce common purpose to bring homeless individuals out of the shadows and promote a common message not to fear law enforcement personnel escorting PIT Count volunteers into encampments.

Homeless individuals that heeded the law enforcement/emergency management warning either sought shelter in drier areas or felt safe to participate in the survey, thus increasing the number of individuals surveyed during the entire PIT Count.

## Increase in the Number Observational Surveys

During the 2017 PIT Count, there was a 65% (201) increase in the number of observational surveys utilized compared to 2016. The U.S. Department of Housing and Urban Development (HUD) makes provisions for using an observational survey instead of an interview survey in the following situations:

- PIT Count volunteer is unable to enter the location to conduct a survey.
- PIT Count volunteer cannot conduct a survey (person refused to answer questions, language or other issues).
- PIT Count volunteer does not wish to disturb people sleeping.

However, due to the limited amount of information collected on the observational survey and the fact that it includes the volunteer's perspective as opposed to the homeless individual's response, it makes the deduplication process challenging. Even though every effort is made to remove duplicates, there is no guarantee that some of the individuals observed may or may not have been interviewed at another time during the PIT Count. The PIT Count Planning Team recommends placing a greater emphasis on using the interview survey instead of the observational surveys as much as possible.

## Service-Based Count

Several challenges were encountered with the service-based count. First, the list of service agencies was not comprehensive because this task was initiated in late December and thus not enough time was permitted to create an exhaustive list. Significant time and staff resources are needed to create such a comprehensive list. The next PIT Count Planning Team should consider eliciting assistance from DPSS Continuum of Care community partners in researching and creating a more comprehensive list of homeless service agencies in Riverside County. Additionally, a more thorough outreach to agencies well in advance of the PIT Count should be conducted.

## Youth Count

The PIT Count Planning Team, and participating youth partner agencies lacked adequate resources to conduct a separate Youth Count to cover the entire geography within Riverside County. Unaccompanied homeless youth are often difficult to find because they tend to: (a) congregate at different times and places than older adults, (b) refuse (or are unaware of) social service programs and agencies, and (c) do not want to be found as they may be fleeing abuse or the foster care system.

Although a separate Youth Count was conducted in 2017, the PIT Count Planning Team met with youth service agencies to identify locations of homeless youth. For future Youth Counts, the PIT Count Planning Team recommends early and ongoing collaboration and planning with youth service agencies to facilitate the planning and implementation of a more comprehensive Youth PIT Count.

## Shelter Count

The sheltered count primarily consisted of extracting data from the HMIS database. However, not all shelters participate in HMIS (such as, providers for victims of domestic violence and hotel/motel vouchers). Some non-HMIS participating agencies do not use a database system to track their data. Instead, they rely on daily written logs and sign-in-sheets to provide the count demographics and household information. Additionally, there have been challenges in collecting the required information from the several non-HMIS agencies in a timely manner. The PIT Count Planning Team recommends that non-HMIS participating agencies continue to be encouraged to utilize the HMIS (except for the Domestic Violence agencies) database in order to collect the required information in a timely manner.

## INTERVIEW SURVEY

USE ONE FORM PER INDIVIDUAL OR FAMILY UNIT.

1. Interview: Where did you and your family sleep last night?

Mark 1 to 13

- |  |  |
|--|--|
| <input type="checkbox"/> 1 Street or sidewalk    | <input type="checkbox"/> 5 Vehicle (car, van, RV, truck) |
| <input type="checkbox"/> 2 Abandoned building    | <input type="checkbox"/> 6 Bus, train station, airport   |
| <input type="checkbox"/> 3 Under bridge/overpass | <input type="checkbox"/> 7 Woods or outdoor encampment   |
| <input type="checkbox"/> 4 Park (Specify) _____  | <input type="checkbox"/> 8 Other (Specify) _____         |

- |  |   |
|--|---|
| <input type="checkbox"/> 9 Emergency shelter     | <input type="checkbox"/> 12 House or apartment                |
| <input type="checkbox"/> 10 Transitional housing | <input type="checkbox"/> 13 Jail, hospital, treatment program |
| <input type="checkbox"/> 11 Motel/hotel          |   |

\*\*IF ANY OF THESE OPTIONS ARE SELECTED, STOP THE SURVEY\*\*

2. Did another volunteer already ask you these same questions about where you stayed last night? ☐ YES ☐ NO

STOP \*\*\*IF YES, STOP THE SURVEY\*\*\* STOP

3. Including yourself, how many adults &amp; children are there in your family unit, who slept in the same location with you last night?

Adults (25+): \_\_\_\_\_ Adults (18-24): \_\_\_\_\_ Children (17 or under): \_\_\_\_\_

4. A) What are your initials [and other people in your family, from oldest to youngest]?

B) What is your relationship with person 2 through 5?

Mark 1 to 5

- |  |   |   |
|--|---|---|
| <input type="checkbox"/> 1 Spouse              | <input type="checkbox"/> 2 Child            | <input type="checkbox"/> 3 Other Family |
| <input type="checkbox"/> 4 Non-Married Partner | <input type="checkbox"/> 5 Other/Non-Family |   |

Person	4A. First/Last Initials	4B. What is your (Person 1's) relationship to Persons 2-5
Person 1:		Self
Person 2:		<input type="radio"/> 1 <input type="radio"/> 2 <input type="radio"/> 3 <input type="radio"/> 4 <input type="radio"/> 5
Person 3:		<input type="radio"/> 1 <input type="radio"/> 2 <input type="radio"/> 3 <input type="radio"/> 4 <input type="radio"/> 5
Person 4:		<input type="radio"/> 1 <input type="radio"/> 2 <input type="radio"/> 3 <input type="radio"/> 4 <input type="radio"/> 5
Person 5:		<input type="radio"/> 1 <input type="radio"/> 2 <input type="radio"/> 3 <input type="radio"/> 4 <input type="radio"/> 5

5. What is the month and year of your birthday and other family members?

	Month	Year
Person 1:		
Person 2:		
Person 3:		
Person 4:		
Person 5:		

6. What CITY and STATE were you born in?

	City	State
Person 1:		
Person 2:		
Person 3:		
Person 4:		
Person 5:		

Read: The next few questions may seem fairly obvious, but we do not want to assume anything. We want to know how you self-identify, so I will read each question and all response options.

7. Are you male (M), female (F), or transgender (TG)?

- Person 1: ☐ M ☐ F ☐ TG ☐ Don't identify as M, F, or TG
- Person 2: ☐ M ☐ F ☐ TG ☐ Don't identify as M, F, or TG
- Person 3: ☐ M ☐ F ☐ TG ☐ Don't identify as M, F, or TG
- Person 4: ☐ M ☐ F ☐ TG ☐ Don't identify as M, F, or TG
- Person 5: ☐ M ☐ F ☐ TG ☐ Don't identify as M, F, or TG

8. Are you Hispanic or Latino?

- Person 1: ☐ YES ☐ NO
- Person 2: ☐ YES ☐ NO
- Person 3: ☐ YES ☐ NO
- Person 4: ☐ YES ☐ NO
- Person 5: ☐ YES ☐ NO

9. What is your race? You can select one or more races.

## Riverside County - 2017 Youth PIT Count Interview Survey Tool

**INTRODUCTION:** Hello, my name is \_\_\_\_\_, and I am helping to conduct a brief survey to better understand the housing needs of young people in our community. It should only take about 5-10 minutes of your time, is confidential, and will help us develop more resources and services for youth. If you have not yet taken this survey, are you interested in taking it now?

SURVEY LOCATION:		City: _____ Zip: _____		SURVEY DATE: _____	
INTERVIEWER:		_____		TIME: _____ AM/PM	
UNIQUE ID:		_____ / _____		_____ / _____	
First & Last Initial		City Born / State Born		Birth Month / Birth Year	
[ENTER COUNTRY IF NOT U.S.]					

## 1. How old are you?

- ☐ Under 18    ☐ 18-24    ☐ 25 and older

2. Where did you sleep on Monday, January 23, 2017?

- ☐ Street or sidewalk  
☐ Vehicle (car, van, RV, truck)  
☐ Park or other public outdoor space  
☐ Abandoned or empty building/squatting  
☐ Bus, train station, airport  
☐ Under bridge/overpass  
☐ Outdoor encampment \_\_\_\_\_  
☐ Emergency shelter  
☐ Transitional housing  
☐ Runaway Homeless Youth Program (TLP/MGH)  
☐ Youth shelter  
☐ Parent, guardian, foster parent or group home  
☐ Friend, partner or other relative's home  
☐ My own home or apartment  
☐ With someone I didn't know because I needed a place to stay  
☐ Motel/hotel  
☐ Hospital, psychiatric facility, or drug/alcohol treatment center  
☐ Juvenile detention, jail, or prison  
☐ Bus, train station, airport  
☐ Other location (specify): \_\_\_\_\_

## 3. Did another volunteer or survey worker already ask you these same questions about where you are staying tonight?

- ☐ No    ☐ Yes -> *Thank you! Those are all the questions I have*

## 4. Can you tell me all the places you slept in the past week?

- ☐ Street or sidewalk  
☐ Vehicle (car, van, RV, truck)  
☐ Park or other public outdoor space  
☐ Abandoned or empty building/squatting  
☐ Bus, train station, airport  
☐ Under bridge/overpass  
☐ Outdoor encampment \_\_\_\_\_  
☐ Emergency shelter  
☐ Transitional housing  
☐ Runaway Homeless Youth Program (TLP/MGH)  
☐ Youth shelter  
☐ Parent, guardian, foster parent or group home  
☐ Friend, partner or other relative's home  
☐ My own home or apartment  
☐ With someone I didn't know because I needed a place to stay  
☐ Motel/hotel  
☐ Hospital, psychiatric facility, or drug/alcohol treatment center  
☐ Juvenile detention, jail, or prison  
☐ Bus, train station, airport  
☐ Other location (specify): \_\_\_\_\_

## 5. What is your race? You can select one or more races. [Read all specific options]

- ☐ American Indian or Alaska Native    ☐ Asian  
☐ Black or African American    ☐ Native Hawaiian or Other Pacific Islander  
☐ White    ☐ Other (specify below): \_\_\_\_\_  
☐ Don't Know/Refuse to Answer

## 6. Are you Hispanic or Latino?

- ☐ Yes, Hispanic/Latino  
☐ No, not Hispanic/Latino  
☐ Don't Know/Refuse to Answer

**READ:** The next few questions may seem fairly obvious, but we do not want to assume anything. We want to know how you self-identify, so I will read each question and all response options.

7. How would you define your gender?

- ☐ Male ☐ Female ☐ Transgender (M->F) ☐ Transgender (F->M)  
☐ Don't identify as male, female, or transgender ☐ Don't Know/Refuse to Ans.

8. What is the longest time you've been continuously homeless?

*Only include time spent staying in shelters and/or on the streets.*

- ☐ \_\_\_\_ Less than 12 months ☐ 12 months or more

9. How many separate times have you been homeless (stayed in shelters or on the streets) in the past 3 years? *Only include time spent staying in shelters and/or on the streets.*

- ☐ \_\_\_\_ 1 time ☐ 2-3 times ☐ 4 or more times

10. In total, how long have you been homeless in the past 3 years? *Only include time spent staying in shelters and/or on the streets.*

- ☐ \_\_\_\_ Less than 12 months ☐ 12 months or more

11. Which of the following best describes how you think of yourself?

- ☐ Lesbian or gay ☐ Straight ☐ Bisexual  
☐ I don't know/questioning ☐ I'd rather not say ☐ Other: \_\_\_\_\_

12. *[If female:]* Are you currently pregnant? *[If male or 'other']:* Are you expecting to become a parent in the next 9 months?

- ☐ \_\_\_\_ Yes ☐ No ☐ Don't know / Refuse to answer

13. *[If 18 or older:]* Have you served in the U.S. Armed Forces (Army, Navy, Air Force, Marines, or Coast Guard)?

- ☐ \_\_\_\_ Yes ☐ No ☐ Don't know / Refuse to answer

14. *[If 18 or older:]* Have you ever received health care or benefits from a Veterans Administration (VA) Medical Center?

- ☐ \_\_\_\_ Yes ☐ No ☐ Don't know / Refuse to answer

**READ:** The next few questions are private and sensitive in nature. I apologize for the sensitive nature. These questions are not meant to make you feel uncomfortable, but rather are simply part of the survey. **YOUR RESPONSES ARE VOLUNTARY.**

15. During the past 30 days, on how many days did you have 4 or more alcoholic drinks in a row?

- ☐ 0 days ☐ 1 day ☐ 2 days ☐ 3 to 5 days ☐ 6 to 9 days ☐ 10 to 19 days  
☐ 20+ days ☐ Don't Know/Refuse to Answer

16. During the past 30 days, on how many days did you use marijuana on your own that is without a doctor telling you to?

- ☐ 0 days ☐ 1 day ☐ 2 days ☐ 3 to 5 days ☐ 6 to 9 days ☐ 10 to 19 days  
☐ 20+ days ☐ Don't Know/Refuse to Answer

17. During the past 30 days, on how many days did you use other illicit drugs or substances on your own that is without a doctor telling you to?

- ☐ 0 days ☐ 1 day ☐ 2 days ☐ 3 to 5 days ☐ 6 to 9 days ☐ 10 to 19 days  
☐ 20+ days ☐ Don't Know/Refuse to Answer

18. Do you have any physical disabilities?

- ☐ \_\_\_\_ Yes ☐ No ☐ Don't know / Refuse to answer

19. Have you ever received special education services from school at any point for more than 6 months?

- ☐ \_\_\_\_ Yes ☐ No ☐ Don't know / Refuse to answer

20. Have you ever received services, or felt like you needed help with your mental health?

- ☐ \_\_\_\_ Yes ☐ No ☐ Don't know / Refuse to answer

21. Do you have HIV/AIDS or have you had any related illness?

- ☐ \_\_\_\_ Yes ☐ No ☐ Don't know / Refuse to answer

22. Have any of the issues we just discussed (alcohol or drug use, physical or mental disabilities, your mental health, learning disabilities, or HIV/AIDS) ever kept you from getting a job or obtaining or staying in stable housing?

- ☐ \_\_\_\_ Yes ☐ No ☐ Don't know / Refuse to answer

23. Do you receive a disability check, such as a Social Security check (SSI or SDI) or a Veteran Disability Compensation check?

- ☐ \_\_\_\_ Yes ☐ No ☐ Don't know / Refuse to answer

24. Have you ever been physically, emotionally, or sexually abused by a relative or another person you have stayed with, such as a spouse, partner, brother or sister, or parent?

- ☐ \_\_\_\_ Yes ☐ No ☐ Don't know / Refuse to answer

25. Have you ever been placed in foster care or stayed in a group home?

- ☐ \_\_\_\_ Yes ☐ No ☐ Don't know / Refuse to answer

25B. *If Yes - If you left in the past 3 years, did anyone help you get housing?*

- ☐ \_\_\_\_ Yes ☐ No ☐ Not in past 3 years ☐ Don't know / Refuse to answer

26. Have you stayed overnight or longer in jail, prison, or a juvenile detention facility?

☐ Yes ☐ No ☐ Don't know / Refuse to answer

26B. If Yes - If you left in the past 3 years, did anyone help you get housing?

☐ Yes ☐ No ☐ Not in past 3 years ☐ Don't know / Refuse to answer

27. Have you stayed overnight or longer in a treatment or healthcare facility?

☐ Yes ☐ No ☐ Don't know / Refuse to answer

27B. If Yes - If you left in the past 3 years, did anyone help you get housing?

☐ Yes ☐ No ☐ Not in past 3 years ☐ Don't know / Refuse to answer

28. Are you currently enrolled in school?

☐ Yes, and attend regularly ☐ Yes, and attended irregularly  
☐ Yes, suspended ☐ No, graduated from high school  
☐ No, obtained GED ☐ No, expelled  
☐ Don't know ☐ No, dropped out within last 6 months  
☐ Refused to answer ☐ No, dropped out 6 months ago or more

29. What is the highest grade or level of schooling you completed?

☐ Less than 5<sup>th</sup> grade ☐ School program does not have grade levels  
☐ 5<sup>th</sup> to 6<sup>th</sup> grade ☐ GED completion  
☐ 7<sup>th</sup> to 8<sup>th</sup> grade ☐ Some post-secondary education/college  
☐ 9<sup>th</sup> to 11<sup>th</sup> grade ☐ Don't know  
☐ 12<sup>th</sup> grade ☐ Refused to answer

30. In the past year, in what ways did you make money? **[select all that apply]**

☐ Full-time job  
☐ Part-time job including on-call or irregular hours  
☐ Working under the table  
☐ Money from friends or family  
☐ Hustling  
☐ Panhandling  
☐ Sex work  
☐ Government program (disability, welfare, food stamps, unemployment, etc.)  
☐ Other (specify): \_\_\_\_\_  
☐ Don't know / Refused to answer

31. Think about the last time you felt you were living in safe and stable housing. How long ago was that?

☐ Less than 1 month ago  
☐ 1 month to less than 3 months ago  
☐ 3 months to less than 6 months ago  
☐ 6 months to 1 year  
☐ More than 1 year  
☐ Never felt stably housed  
☐ Don't know/Refused to answer

32. Who did you live with the last time you lived in stable housing?

☐ Family member ☐ Friend(s) / roommate(s)  
☐ Partner/significant other ☐ Alone  
☐ Don't know / Refused to answer

33. What is the primary reason you left or lost your last stable housing situation?

☐ Chose to leave ☐ Forced to leave  
☐ Don't know / Refused to answer

34. In order to stay in any housing situation, have you ever...? **[select all that apply]**

☐ Stayed with someone you didn't know or trust  
☐ Stayed somewhere you didn't feel safe  
☐ Stayed with a sexual partner that you would not have otherwise  
☐ Stayed on a couch or floor for longer than one week  
☐ None of the above ☐ Don't know / Refused to answer

35. In the past years, what services or supports, for example from government programs or charities, have you accessed? **[select all that apply]**

☐ Free meals ☐ Housing services  
☐ Drop-in/day services ☐ Education services  
☐ Legal assistance ☐ Health services  
☐ Mental health services ☐ Substance abuse treatment/services  
☐ Transportation assistance or bus passes  
☐ Job training or employment services  
☐ Other: \_\_\_\_\_ ☐ No ☐ Don't know / Refused to answer

36. In the past years, what issues have you encountered in trying to get help or access services? **[select all that apply]**

☐ Lack of transportation ☐ Didn't know where to go for help  
☐ Didn't have I.D./personal docs ☐ Didn't qualify for services  
☐ Language barrier ☐ Placed on a waitlist and never heard back  
☐ Couldn't access because of age ☐ No issues accessing services/assistance  
☐ Don't know / Refused to answer ☐ Other (specify): \_\_\_\_\_

RIVERSIDE COUNTY CoC

Unsheltered YOUTH Street Count Form – Observational Tool

JAN. 24 – 30, 2017

Location of Interview: \_\_\_\_\_ City \_\_\_\_\_ Zip Code \_\_\_\_\_  
 (street intersection/specific location) (Zip Code is required)

Interviewer Name \_\_\_\_\_ Date: \_\_\_\_\_ Time: \_\_\_\_\_ AM/PM

**USE ONE FORM PER INDIVIDUAL OR FAMILY UNIT.**

**1. Please indicate why you are using the observational tool:**

CHECK ONE PER PERSON	1	2	3	4	5
Barriers to enter site	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Site was unsafe to enter	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Person refused to participate	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Person was sleeping	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

## Appendix D: PIT Count Misconceptions

# Here are the 5 Most Common Misconceptions about PIT Count Estimates

written by Sam Batko

February 11, 2014

*Are you releasing your Point-in-Time (PIT) Count numbers soon? We at the Alliance have noticed a number of inaccuracies in stories in the media having to do with the PIT Count estimates of homeless populations and we have noted five points in particular on which journalists may sometimes want clarification. The Alliance's Homeless Research Institute has put together a media resource, "5 Myths about PIT Counts" to help journalists. We encourage you to provide it to journalists when you announce the 2014 PIT Count estimate for your community. You can download it [here](#).*

### 5 MYTHS about PIT COUNTS

February 2014

**Myth 1: Point-in-Time counts do not count every homeless person and therefore are inaccurate.**

**PIT counts are a solid count of people experiencing homelessness in shelters, transitional housing, and on the street, in cars, in abandoned buildings, and in other places not intended for human habitation.**

People experiencing homelessness in unsheltered locations are particularly difficult to find and enumerate. The PIT counts do miss people, as do most censuses. Nevertheless, PIT counts are important. They are the **ONLY** measure that captures the scope of people experiencing homelessness who are unsheltered – living on the streets, in cars, in abandoned buildings, and other places not meant for human habitation. And, by using the same methodology every year, PIT counts allow a community to assess the relative size of the homeless population over time.

**Myth 2: Other national statistics contradict the data presented in Point-in-Time counts.**

**There are several national data sources on homelessness, but they do not cover the same population over the same time period, and subsequently cannot be directly compared to the PIT count.**

PIT counts cover all people sheltered in homeless programs and unsheltered on a given night. They are conducted in every community, and are required by the U.S. Department of Housing and Urban Development (HUD). HUD also requires communities to collect data on people in homeless programs over the course of a year via Homeless Management Information Systems (HMIS). The Department of Education (Education) counts children who are enrolled in school and living in shelter, unsheltered situations, hotels and motels, and doubled up with family or friends during the school year. The U.S. Census Bureau includes a measure for people experiencing homelessness in the decennial Census.

These measures examine different populations over different time periods using different methodologies and cannot be directly compared. They have, however, tended to show similar trends over time. For example, between 2012 and 2013, both the PIT count and the Education data showed that the number of people who live in shelters, transitional housing, and unsheltered has gone down.

**Myth 3: Point-in-Time counts are meant to provide data on everyone who is homeless during a year.**

**PIT counts are intended to provide a snapshot of how many people are homeless on a given night.**

PIT counts provide the number of people living in emergency shelters, transitional housing, and unsheltered locations in a community. They provide little detailed information about the characteristics of who experiences homelessness over time in a community. Communities can glean more information on homelessness over the course of a year by examining the data collected in HMIS.

Data from HMIS, however, does not provide information about the scope of unsheltered homelessness. PIT counts are uniquely valuable in that respect.

**Myth 4: Fluctuations in the Point-in-Time counts simply reflect fluctuations in the number of shelter beds – not in the number of homeless people.**

**The PIT counts reflect the interaction among people in beds, people unsheltered, and utilization of beds.**

PIT counts can be affected by the number of beds, but they also count people who are not sheltered reflecting the entire population of people who are literally homeless. PIT counts also reflect the varying utilization of beds (i.e., they sometimes go unused). For example, in 2013 the number of shelter and transitional housing beds went down, but the number of people in those beds went up meaning vacancy was reduced.

**Myth 5: If the Point-in-Time count is down, it means that there is enough affordable housing in the community.**

**The PIT describes how the homeless system is managing people's experience of the shortage of affordable housing – not the availability of that housing.**

The PIT count does not describe the affordable housing crisis. For that, a community should examine how many affordable units there are for the number of extremely low income households, the number of households that are doubled up, and the percentage of income that people pay for rent, among other things. Data on these measures is available from HUD and the U.S. Census Bureau.

A Point-in-Time count is a one-night, unduplicated count of people experiencing homelessness in a Continuum of Care (CoC). HUD requires that CoCs count their sheltered homeless population every year. They require that CoCs count their unsheltered homeless population every other year, on odd numbered calendar years. In 2012, despite not being required, 67 percent of CoCs conducted an unsheltered count. CoCs are expected to conduct their count during the last 10 days of January.

## Appendix E: HUD Youth Homeless Definition

DETERMINING HOMELESS STATUS OF YOUTH QUICK GUIDE		
Category	 Living situation	Types of Documentation <i>(responsibility of intake worker to obtain the highest level of documentation possible in each situation)</i>
Category 1 Literal Homelessness	<ul style="list-style-type: none"> <li>Shelter including emergency shelter, transitional housing, or hotel or motel paid by government or charity</li> <li>Street or other place not meant for human habitation (ex. car, garage, park, abandoned building)</li> <li>An institution (ex. jail, hospital, juvenile detention) that the youth is exiting and where youth was resident for 90 days or less AND the youth resided in emergency shelter or place not meant for human habitation immediately prior to entering that institution</li> </ul>	<ul style="list-style-type: none"> <li>Third party documentation, such as:               <ul style="list-style-type: none"> <li>HMIS or victim services provider database printed record</li> <li>Written statement by housing or services provider such as homeless liaison, street outreach worker, or shelter provider, or</li> </ul> </li> <li>Intake worker direct observation recorded in the file, or</li> <li>Certification of homelessness by youth AND documentation of intake worker's attempts to verify information, or</li> <li>(If exiting institution) Discharge paperwork or a written or oral statement from staff of the institution with beginning and end dates of the time the youth spent in the institution OR certification by youth that they exited institution AND documentation of intake worker's <b>attempts</b> to verify information. Also documentation of shelter or place not meant for human habitation prior to entering institution.</li> </ul> <p>NOTE: A youth asking for emergency shelter or street outreach can self-certify their homelessness. This could be a sign-in sheet for shelter with a certification on top that the people signing in are homeless. No further documentation or attempts to verify are required to access emergency shelter.</p>
Category 2 Imminent Risk of Homelessness	<ul style="list-style-type: none"> <li>In own housing, but being evicted within 14 days</li> <li>A hotel or motel paid for by the youth, family or friends where the youth cannot stay for more than 14 days (often due to lack of ability to continue paying)</li> <li>With family or friends and being asked to leave within 14 days</li> </ul> <p>Additionally, the youth must have no safe alternative housing, resources or support networks to maintain or obtain permanent housing.</p>	<p>Documentation that youth will lose their housing within 14 days:</p> <ul style="list-style-type: none"> <li>Notice of eviction or equivalent legal document, or</li> <li>Proof of inability to continue to pay for hotel or motel, or</li> <li>Statement by youth that they cannot continue to stay at the place they have been AND written or oral verification from owner or renter of housing obtained by intake worker OR documentation of intake worker's <b>attempts</b> to verify information; and</li> </ul> <p>Documentation that the youth has no safe alternative housing, no financial or other resources, and no family or other support networks. Youth can self-certify this.</p>
Category 3 Homeless Under other Federal Statutes	<p>Youth who do not qualify as homeless under the other 3 Categories but who:</p> <ul style="list-style-type: none"> <li>Are homeless under other federal statutes including the Runaway &amp; Homeless Youth Act</li> <li>Have not had their own place with a lease, ownership interest or occupancy agreement in the last 60 days</li> <li>Have moved two or more times in the last 60 days</li> <li>Can be expected to have continued housing instability because of a disability, substance use addiction, history of domestic violence or child abuse, or two or more barriers to employment</li> </ul>	<ul style="list-style-type: none"> <li>Certification of homeless status by the non-profit, or state or local government entity, responsible for administering homeless assistance under other federal statutes, and</li> <li>Certification by the youth that they have not had a lease or other agreement for housing in the last 60 days with written documentation (e.g., from an outreach worker or homeless liaison) OR documentation of intake worker's <b>attempts</b> to verify information, and</li> <li>Certification by the youth that they have had two or more moves in the last 60 days with written documentation OR documentation of intake worker's attempts to verify information, and</li> <li>Documentation of special needs (e.g., copy of SSI check, third party verification, direct observation) or at least two barriers to employment</li> </ul> <p>NOTE: HUD must approve CoC Program funded projects to serve youth under Category 3. ESG funded projects do not require HUD approval.</p>
Category 4 Fleeing Domestic Violence	<p>Youth fleeing or attempting to flee their housing or the place they are staying because of domestic violence, dating violence, sexual assault, stalking, or other dangerous or life-threatening conditions related to violence that has taken place in the house or has made them afraid to return to the house, including:</p> <ul style="list-style-type: none"> <li>Trading sex for housing</li> <li>Trafficking</li> <li>Physical abuse</li> <li>Violence (or perceived threat of violence) because of the youth's sexual orientation</li> </ul> <p>Additionally, the youth must have no safe, alternative housing, resources or support networks to maintain or obtain permanent housing.</p>	<p>For providers that are not victim service providers:</p> <ul style="list-style-type: none"> <li>Statement by youth that they are fleeing because of domestic or other violence AND</li> <li>If the safety of the youth is not jeopardized, verification of the statement through written observation by the intake worker or staff at other organizations including law enforcement, housing or service provider, social worker, homeless liaison or legal assistance provider youth has sought assistance from OR documentation of intake worker's <b>attempts</b> to verify information and certification of the statement by the youth or intake worker</li> </ul> <p>For victim service providers:</p> <ul style="list-style-type: none"> <li>Statement by youth that they are fleeing domestic or other violence AND</li> <li>Certification of the statement by the youth or intake worker</li> </ul> <p>All providers must obtain a youth's self-certification that the youth has no safe alternative housing, no financial or other resources, and no family or other support networks. The intake worker should obtain any available documentation or statements supporting the youth's certification.</p>

NOTE: Additional guidance on documenting homeless status can be found at [Criteria and Recordkeeping Requirements for Definition of Homeless – HUD Exchange](#). Youth who are not determined to be homeless under one of the Categories above may be considered [at-risk of homelessness](#) and eligible for homelessness prevention services funded through ESG.
